## Education

**school number 1 by the name of Loiq Sherali**                    *Enrolled April 2019*
*Guitar course*

I have been learning guitar for 4 years  in musical school

**Tajrupt**                    *Graduated July 2018*
*Model United nations Course*

I have taken a model UN course at Tajrupt and was the best delegate in Model United Nations Simulation on the topic of cyberwarfare

**Tajrupt**                    *Graduated October 2018*
*State of affairs*

I was a part of the state of affairs course in Tajrupt where I learned about liberalism and conservatism equity and equality globalization and few more other topics

**Tajrupt**                    *Graduated June 2018*
*Economics*

In the summer of 2018, I had the pleasure of joining to econ course that was led by Kevin Behr a graduate of the University of Washington in this course I learned

1. Supply and Demand

2. GDP and GDP per capita

3. Marginal cost

4. Globalization

5. Revenue

6. Monopoly

7.Global warming

**Berea College**                    **Berea, Kentucky**
*Cyber security*                    *Enrolled April 2019*

currently, I have almost finished my cybersecurity course where I learned a lot of really interesting stuff its a course for Berea college students who practice in computer science but Codepath decided that I can also join this course even if I am 16 I have enough knowledge and willing to study and I am doing pretty good my course grade is 89%

**Tajrupt**                    *Graduated November 2017*
*TOEFL*

I have completed a TOEFL prep course

## Employment History

**TajRupt**                    **Khujand, Sughd Province**
*Teaching assistant*                    *January 2018 - May 2018*

at the beginning of 2018, a had the luck of becoming a teaching assistant in Innovation incubator course which was led by Azizjon Azimi the Founder and Chairman of Tajrupt and a student of Harvard and Standford Universities as A teacher assistant I have developed my leadership skills but more importantly, I have learned A lot of very interesting topics and innovations that are happening today in the world I have learned about

1. Artificial Intelligence and its future potential also I have worked on a project which was pointing to the potential of Tajikistan hosting big data centers and becoming the first AI hub in central Asia because of its location, Weather, Labor and resources

2. blockchain and cryptocurrency.

this course was very special to me because of its structure we had a lot of case studies we looked into the stories of famous and successful companies like Nike  Facebook  and were trying to understand what was it that made them so successful I liked it a lot because it was looking to the roots  and early stages of startup

**TajRupt**                    **Khujand, Sughd Province**
*Intern*                    *October 2017 - July 2018*

**American Space Khujand**                    **Khujand, Sughd Province**
*Volunteer*                    *April 2017 - Present*

As a volunteer in ASK, my job is to lead clubs

here is the list of  clubs I led and currently lead

1. Discussion club

2. English Club

3. Coding Club

**Territoriya Yumora**                    *February 2017 - Present*
*Comedian*

at the age of 14, I have found out that I am a pretty fun guy who has some humor skills so I became a stand-up comedian and had some performances I can proudly say that I belong to one of the pioneers of Stand up comedy in Tajikistan

here is a link to watch one of the shows that I have performed in as a Standup comedian

https://www.youtube.com/watch?v=53FYtG9GPag&t=376s

## Hobbies &amp; Interests

I can say that I have a lot of different hobbies which make me a very unique  Person

1. Play guitar enjoy Music I am a big fan of Michael Jackson he was a real king

2. I love languages I learn them very swiftly I have learned English for a very short period of time

3. I love coding building websites I have completed web development path in codecademy.com and now I am capable of building interactive websites with the code here is an example of a website that I have built but it was without coding just drag and drop method  tajrupt.org currently I am working on my own website which will contain all info about me my resume personal statement etc.

Also, I am learning to build apps with react native

4.comedy I love laughing and making people laugh makes me happy
